MSc Computer Science student (First-Class BSc) with full-stack, CI/CD and self-hosted infrastructure experience plus embedded firmware shipped in a real product.

SKILLS

- **Languages:** Python, JavaScript, Java, C, Dart
- **Web & Mobile:** React, Node.js, Three.js, Flutter
- **Infrastructure:** Git, GitHub Actions, Docker, Linux, Cloudflare
- **Embedded:** ESP32, FreeRTOS, BLE, UART, Raspberry Pi
- **Data:** SQLite, NumPy, MATLAB, Gradio
- **Spoken Languages:** English, Ukrainian, Russian

EDUCATION

University of St Andrews 2026 - expected 2027
MSc Computer Science
- Modules: Object-Oriented Modelling, Design and Programming; Fundamentals of Software Engineering; Data-Intensive Systems; Machine Learning; Interactive Software and Hardware
- Coursework: Implemented a loyalty card system in **Java** against a given set of interfaces, with a **JUnit** test suite covering normal, edge and exception cases.

Lancaster University 2022 - 2025
BSc (Hons) Computer Science - **First-Class Honours**
- Coursework: Developed a **Java** presentation app for computer scientists in a team of 4, using MVC architecture and **GitLab** for version control. Implemented the controller layer that connected the UI to the model.

WORK EXPERIENCE

Founder & Developer - PowerBander 2026 - Present
- Implemented dual-core ESP32 firmware in **C** using **FreeRTOS**, separating BLE GATT communications from real-time GPS parsing and hardware solenoid control, with semaphores synchronising access to shared device data.
- Built and published the official iOS companion app in **Flutter** (**50**+ downloads on the App Store), providing real-time wireless BLE control and display of sensor data.
- Launched an interactive 3D e-commerce storefront using **Three.js,** self-hosted on a Linux Raspberry Pi server.
- Designed and prototyped the Touge Chime using CAD design, 3D printing and custom fabrication.
- Generated **1.5M+** views across Instagram and TikTok, gained **1K+** Instagram followers and captured **300+** waitlist sign-ups for the first product batch.

Teaching Assistant - Lancaster University Jan - May 2025
- Supported undergraduate students in learning functional programming concepts through debugging, hands-on guidance and structured feedback during laboratory sessions.
- Facilitated group project practical sessions and advised teams on best practices.

PROJECTS

Self-hosted Web Infrastructure - (kyrylo.uk, rpparts.uk)
- Built and deployed **React** sites (**Node.js/SQLite** backend) for myself and a manufacturing client, with **GitHub Actions** CI/CD to a self-hosted Linux server running **Docker** and **Cloudflare Tunnels**.

Image to STL
- Created a **Python** tool that converts images into 3D printable STL mesh models via heightmaps using **Trimesh**, **NumPy** and **Pillow** with a simple **Gradio** UI.

VOLUNTEERING

Volunteer & Team Leader - Help Deliver Aid To Ukraine Mar - Jun 2022
- Managed and worked as a team of volunteers to load humanitarian aid onto **5** lorries bound for Ukraine.
- Raised **over £7,000** through a social media campaign that promoted the fundraiser and built public awareness.

Team Member - UKRO-SAXONS 2022 - 2024
- Helped transport 4x4 vehicles full of humanitarian aid to Poland on **2** trips, for onward delivery to Ukraine.

INTERESTS - Video Production (filming and editing); Classic JDM cars; Volleyball; Travelling
