PERSONAL PROFILE

MSc Computer Science student at the University of St Andrews specializing in Artificial Intelligence and Embedded Systems. Hardware-software engineer experienced in real-time microcontroller firmware (ESP32), C, sensor integration, and spatial processing utilities, focusing on deploying lightweight machine learning and vision models to resource-constrained hardware.

SKILLS

AI & Data Processing	Python	NumPy	Trimesh	Pillow	Gradio	MATLAB	
Embedded Systems & Robotics	C	ESP32	Multi-core execution	Bluetooth low energy	Raspberry Pi	CAD	3D Printing
Web Software and Apps	Three.js Dart	Node.js Flutter	React.js JavaScript	Cloudflare Java	GitHub Actions	Docker	Linux
Languages	English	Ukrainian	Russian				

WORK EXPERIENCE

Founder & Developer – **PowerBander** (Jan 2026 – Present)

- Designed and prototyped the Touge Chime (an automotive mechanical speed warning device) using **CAD** design, **3D Printing** and custom fabrication.
- Programmed embedded C firmware on an **ESP32**-Mini microcontroller, leveraging dual cores to handle **BLE** companion app connectivity alongside real-time GPS data processing and solenoid control.
- Developed a garage-themed, interactive 3D e-commerce storefront utilizing Three.js, self-hosting the full-stack infrastructure on a **Linux Raspberry Pi** server.
- Published the official iOS companion app using **Flutter**, providing real-time wireless control of Touge Chime over **BLE** communication.
- Executed a viral organic video marketing campaign for PowerBander generating **1M+** views and **1k+** Instagram followers, capturing **300+** genuine waitlist sign-ups for Batch 1 of the Touge Chime.

Teaching Assistant - Lancaster University (Jan 2025-May 2025)

- Supported undergraduate students grasp functional programming concepts by providing feedback and support in laboratory sessions and offering help to debug and answering questions.
- Assisted professors in facilitating group project practical sessions and advising teams on best practices.

PROJECTS

Portfolio Website (Kyrylo.uk)

- Ubuntu/iOS simulator portfolio website with an embedded Falling Blocks arcade game and persistent high scores. Built using **React.js** with the backend powered by **Node.js** and **SQLite**.

Image To STL

- Created a **Python** tool that converts images into 3D printable STL mesh models via heightmaps using **Trimesh**, **NumPy** and **Pillow** with a simple **Gradio** User Interface.

EDUCATION

University of St Andrews (2026-2027) MSc Computer Science

Lancaster University (2022-2025) BSc (Hons) Computer Science - **First-class**

VOLUNTEERING

Help Deliver Aid To Ukraine (Mar 2022 – Jun 2022) - **Volunteer & Team Leader**

- Managed and worked as a team of volunteers to load humanitarian aid onto lorries bound for Ukraine.
- Raised **over £7,000** through a social media campaign that promoted the fundraiser and built public awareness.

UKRO-SAXONS (Jul 2022 - 2024) - **Team Member:**

- Transitioned to sending 4x4 vehicles full of humanitarian aid after **5** lorries worth of aid was delivered.

INTERESTS

Video production (filming and editing)	Classic Cars	Volleyball	Travelling
